

Plug-in solar module for electrical energy supply via the socket

250 Wp - Plug-in module P60

World Innovation 2014:
 - innovative frame
 - integrated power inverter for immediate energy supply

Electrical energy supply via the socket for the own home network, feasible through the integrated power inverter

Power is ensured by the positively sorted power classes from 0 to 4.99 Wp

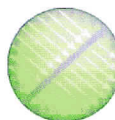

solar modules are manufactured in Germany, in the south of Brandenburg, and are produced by Algatex

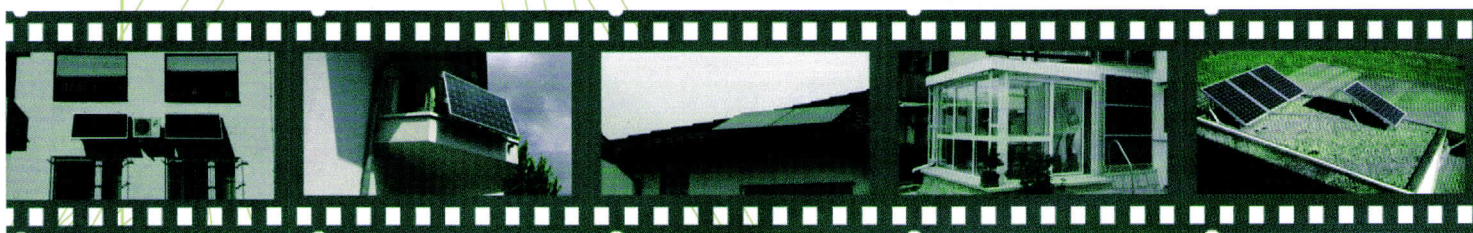

Innovative 60mm frame as mounting rail for a particularly easy and cheap installation

Chamfered frame allows a better rain and snow drainage

3mm thick solar glass, classified as U1, ensures maximum transmission values and thus, efficiency of the highest standard

Made in GERMANY
